Data cleaning and analysing and report

## **Research Interests**

My research interests focus on issues relating to internal migration and urbanization, including social stratification and mobility, migrant workers and health, migration and labour market and housing market and migration community.

The current research involves the examination of permanent settlement intentions of China's rural-urban migrants (floating population), the distributions and determinations of migrants' income in host cities, the health status of Chinese-born migrants in Australia and the related theoretical and policy implications of migration both in China and the international context.

## **Education**

10/2014-	<b>Macquarie University</b> Cotutelle PhD candidate in the Department of Marketing and Management	Sydney, Australia
09/2012-06/2016	<b>Graduate School of Chinese Academy of Social Sciences (CASS)</b> PhD (Population and social structures) in Institute of Population and Labour Economics (IPLE) of CASS	Beijing, China
