Annex 6: Summaries of 2016 scientific and training meetings	17

Introduction

The year 2016 was largely devoted to the preparation of the 2017 International Population Conference and in particular the Call for papers, which closed in December with a record 4,572 submissions. The IUSSP also organized 16 scientific and training activities involving 608 participants from all regions of the world; 10 of these activities were related to the Data Revolution. The IUSSP increased its communication via the IUSSP website, social media, and email, pursuing the weekly publication of its new policy-oriented magazine (N-IUSSP). 2016 also marked a year of reduced funding for population activities resulting in budget deficits. In response to this worrisome trend, the IUSSP worked with consultants to evaluate IUSSP's business plan and develop a strategy for the Union to become sustainable in the long term. As part of this evaluation, the IUSSP reached out to members with a survey to explore the types of activities to engage in for the future. This report provides information on these activities and others carried out in 2016.

International Population Conference

The Call for Papers for the 2017 International Population Conference was launched in early 2016 with a printed version of the Call for Papers sent by post to IUSSP members, population research and training institutions and UNFPA offices throughout the world, and also distributed at the PAA annual meeting and three regional population conferences. By the deadline for submissions on 15 December a new record of over 4,500 submissions had been received from authors based in 131 countries. The most popular theme was once again Health, Mortality and Longevity with 638 submissions, followed by Migration and Urbanization with 445 submissions and Sexual and Reproductive Health with 443 submissions. A group of 105 volunteer reviewers and 132 organizers and conveners will evaluate the submissions and select 880 papers for 220 oral sessions and over 1000 papers for posters. The final selection for the scientific programme will be decided by the International Organizing Committee (IOC), which will meet in Paris on 12 and 13 April 2017. To raise funds for the Conference, the IUSSP has also set aside a limited number "Research Leader Sessions" for organizations working in the population field to sponsor and organize. IUSSP contracted with the Conference Exchange to provide the software and technical support for the on line submissions and review software.

Information pertaining to the 2017 IPC is available on the conference website: <u>http://ipc2017capetown.iussp.org/</u>.

Scientific meetings

In 2016, the IUSSP and its Scientific Panels, in collaboration with partner institutions, organized 8 seminars, 4 training workshops, one expert meeting, one side meeting and three sessions at other conferences. Approximately 330 individuals directly participated in these activities. A total of 136 papers were presented at these meetings.

In order to facilitate the participation of students and scholars from developing countries the IUSSP provides some travel support when funding is available. In 2016, the IUSSP provided direct support for travel to 29 participants from developing countries to attend IUSSP meetings. Panel members and the IUSSP Secretariat raised and managed funds from several donors to provide travel support and collaborated with 12 institutions in the organisation of the following scientific seminars and meetings:

1. Expert Meeting: Towards the next generation of record-linkage studies to advance data quality assessment of civil registration systems in low- and middle-income

countries, Washington, DC, United States, 4-5 April 2016. [Organized by the IUSSP Scientific Panel on Innovations for Strengthening CRVS Systems]

- 2. Workshop: Social media and demographic research, at the 10th International AAAI Conference on Web and Social Media (ICWSM-16), Cologne, Germany, 17 May 2016 [Organized by the IUSSP Scientific Panel on Big Data and Population Processes]
- 3. Seminar: Registering and counting the population: the production and exploration of census information from early modern times to the end of 20th century, Campinas São Paulo, Brazil, 19-21 May 2016. [Organized by the IUSSP Scientific Panel on Historical Demography]
- 4. Workshop : The challenges of demographic data in Sub-Saharan Africa in the framework of the Sustainable Development Goals (SDGs), Paris, 31 May 2016 [Organized by : DEMOSTAF, INED (Pôle PI & UR DEMOSUD) and IUSSP]
- 5. Seminar: Medication abortion: availability and use, and impact on abortion safety and women's health, Dakar, Senegal, 6-8 July 2016. [Organized by the IUSSP Scientific Panel on Abortion Research]
- 6. Workshop: Completion of volumes on the Demographic Dividend linked to education and the economy, Ouagadougou, Burkina Faso, 25-27 July 2016. [Organized by the IUSSP Network on Strengthening Demographic Training in Francophone Africa]
- 7. Seminar: Causal mediation analysis in health and work, Rostock, Germany, 26-29 September 2016. [Organized by the IUSSP Scientific Panel on Pathways to Health]
- 8. Side Meeting: Assessment of civil registration and vital statistics using direct methods, at the ALAP/ABEP Congress, Foz do Iguaçu, Brazil, 18 October 2016. [Organized by the IUSSP Scientific Panel on Innovations for Strengthening Civil Registration and Vital Statistical Systems]
- 9. Round Table: Web and social media for demographic research, at the ALAP/ABEP Congress, Foz do Iguaçu, Brazil, 19 October 2016. [Organized by the IUSSP]
- 10. Round Table: Evaluation of civil registration and vital statistics from an academic perspective, at the ALAP/ABEP Congress, Foz do Iguaçu, Brazil, 20 October 2016. [Organized by the IUSSP Scientific Panel on Innovations for Strengthening Civil Registration and Vital Statistical Systems]
- 11. Workshop: Web, social media, and cellphone data for demographic research, at the 8th International Conference on Social Informatics (SocInfo 2016), Bellevue, Washington, United States, 14 November 2016. [Organized by the IUSSP Scientific Panel on Big Data and Population Processes]
- 12. Session: Advancing the Data Revolution through record linkage and data integration, at the 15th Conference of the International Association for Official Statistics (IAOS), Abu Dhabi, United Arab Emirates, 6 December 2016. [Organized by the IUSSP Scientific Panel on Innovations for Strengthening Civil Registration and Vital Statistical Systems]
- 13. Seminar: Linking past to present. Long-term perspectives on micro-level demographic processes, Kashiwa, Japan, 9-11 December 2016. [Organized by the IUSSP Scientific Panel on Historical Demography]

Summary reports for these activities are available in Annex 6.

Future seminars and meetings

In 2016, the IUSSP and IUSSP Scientific Panels were actively preparing, in addition to the 28th International Population Conference in Cape Town, the following activities for 2017:

- Workshop: Communicating on the Demographic Dividend with policy makers and journalists, Yaoundé, Cameroon, 9-13 January 2017. [Organized by the IUSSP Network on Network on Strengthening Demographic Training in Francophone Africa].
- Seminar: Mortality Analysis and Forecasting, New Delhi, India, 6-7 April 2017. [Organized by the IUSSP Scientific Panel on Lifespan Extension with Varying Cause-ofdeath Trajectories].
- Workshop: Subjective Well-being and Demography at the 2017 PAA, Chicago, United States, 26 April 2017. [Organized by the IUSSP Scientific Panel on Subjective Well-being and Demographic Events].
- Workshop: Social media and demographic research: applications and implications, at the 11th International AAAI Conference on Web and Social Media (ICWSM-17), Montreal, Canada, 15 May 2017. [Organized by the IUSSP Scientific Panel on Big Data and Population Processes].
- Workshop: Climate, Migration and Health with a focus on refugee movements, Boulder (Colorado), United States, 25-26 May 2017. [Organized by the IUSSP Scientific Panel on Migration, Climate and Health].
- Seminar: Urban Health Transformations, Cambridge, United Kingdom, 11-12 July 2017. [Organized by the IUSSP Scientific Panel on Historical Demography].
- Seminar: Pandemics: reflections on the centennial of the 1918 Spanish Influenza Virus, Madrid, Spain, 27-29 November 2017. [Organized by the IUSSP Scientific Panel on Historical Demography].

Training workshops and resources

In 2016, IUSSP groups organized four training workshops, which included a total of 278 participants. The IUSSP provided direct travel support to 80 participants, all of whom were from developing countries. One workshop focused on the Demographic Dividend in Africa and was supported by an ongoing grant from the William and Flora Hewlett Foundation. The other three workshops, also funded by the William and Flora Hewlett Foundation, focused on the use of social media and cell phone data for population research.

- Training Workshop: Communicating on the Demographic Dividend with policy makers and journalists, Mbalmayo, Cameroon, 24 March 2016. [Organized by the IUSSP Scientific Panel on Network on Strengthening Demographic Training in Francophone Africa].
- Training Workshop: Social media and demographic methods, preconference workshop at the Annual Meeting of the Population Association of America, Washington, DC, United States, 30 March 2016. [Organized by the IUSSP Scientific Panel on Big Data and Population Processes].
- Training Workshop: Web, social media data and demographic research, preconference workshop at the European Population Conference, Mainz, Germany, 31 August 2016. [Organized by the IUSSP Scientific Panel on Big Data and Population Processes].

• Training Workshop: Web and social media for demographic research, at the ALAP/ABEP Congress, Foz do Iguaçu, Brazil, 17 October 2016. [Organized by the IUSSP Scientific Panel on Big Data and Population Processes].

Summary reports for these activities are available in Annex 6.

Demography and the Data Revolution

Over the past two years, the IUSSP has taken the lead in organizing and participating in a broad set of activities in the area of the Data Revolution. These activities aimed, first, to reflect on the potential contributions that demographers could make broadly to the Data Revolution and specifically to measuring indicators associated with the Sustainable Development Goals (SDGs), secondly, to make demographers more aware of ongoing work by non-demographers that is relevant to the population science community, and finally, to promote exchanges between demographers and non-demographers (epidemiologists, computer scientists...) in this area by organizing events at the conferences of other disciplines featuring demographers.

Two scientific panels have actively organized activities around the Data Revolution in 2016. The Panel on Big Data and Population Processes organized three training workshops at three regional population conferences and two research workshops at conferences focusing on the use of new data, with the aim of fostering communication between demographers and data scientists. The Panel on Innovations for Strengthening Civil Registration and Vital Statistical Systems organized an expert meeting in collaboration with the World Bank, a side meeting and a round table at a regional population conference as well as a session at a statisticians' conference. In addition, IUSSP Vice President Tom LeGrand and Council member Tom Moultrie have participated in events representing demographers in discussions around the measurement of the SDGs and informing demographers of developments in this field at regional population conferences. Data Revolution activities were funded by the William and Flora Hewlett Foundation, through grants made to the IUSSP and to the Population Association of America (PAA). Information pertaining to the Data Revolution is available on the IUSSP website: http://iussp.org/en/demography-and-data-revolution.

Publications

The IUSSP disseminates the scientific results of its activities through its website, in scholarly peer-reviewed journals and edited volumes. In 2016, one edited volume and one special issue of a peer-reviewed journal were devoted to papers from IUSSP seminars. Papers from IUSSP seminars were also published individually in journals. Seminar papers are made available to IUSSP members and all seminar reports are available to the general public on the IUSSP website. In 2016, the IUSSP published four quarterly IUSSP Bulletins and 46 N-IUSSP articles.

Books

• *New Approaches to Death in Cities during the Health Transition*, International Studies in Population, Vol. 12, Diego Ramiro Fariñas and Michel Oris, eds., Springer, 2016.

Special issues in peer-reviewed journals

• Special issue on Demographic differential vulnerability to climate-related disasters, Raya Muttarak and Leiwen Jiang, eds., in *Vienna Yearbook of Population Research*, Volume 13, 2015.

IUSSP Bulletin

- IUSSP Bulletin No 31: March 2016
- IUSSP Bulletin No 32: June 2016
- IUSSP Bulletin No 33: Sept 2016
- IUSSP Bulletin No 34: Dec 2016

N-IUSSP

In 2015, IUSSP partnered with Neodemos, an online Italian website on demographic issues, to establish a new IUSSP news magazine, *N-IUSSP* to disseminate scientific findings from demographic research carried out by IUSSP members and other population researchers from all over the world. The website also includes a "Did you know?" section featuring graphs depicting demographic phenomena and short video presentations summarizing demographic and population topics.

In 2016, *N-IUSSP* published 46 articles, one article per week except during summer and winter holidays. Readership has increased steadily since the site was launched in November 2015, both among IUSSP members and external subscribers. In 2016 the N-IUSSP website received 24,294 page views. According to a membership survey carried out in the summer of 2016, these articles appear to be greatly appreciated by many IUSSP members.

All *N-IUSSP* articles and "Did you know?" features are available at: <u>http://www.niussp.org/</u>.

IUSSP communication

The IUSSP communicates with members and the public through its bilingual English/French website (iussp.org), email, and its quarterly newsletter. In 2016, the IUSSP also regularly disseminated information via Twitter and Facebook.

The Secretariat regularly updates the website with information on IUSSP activities and events as well as those of other organizations in the population field or in related fields including information on forthcoming conferences, calls for papers, fellowships and job announcements, as well as members' recent publications and activities. These announcements are sent by email and also tweeted and posted on Facebook and the information is summarized in the quarterly IUSSP newsletter. In 2016, the Secretariat sent 204 email announcements to members and produced 4 newsletters.

The Membership Directory is now open to the public. Anyone can search for a member by name or find individuals by field of study, specialization, regional focus, language, or country of residence. This resulted in a 3-fold increase in the number of page views from 331 in 2015 to 1,267 in 2016.

In 2016 the IUSSP website recorded 88,537 page views, a 40% increase over 2015, largely due to the call for papers, and 52,929 users, a 29% increase over 2015. The top ten country sources of website sessions in 2016 were the United States, India, France, United Kingdom, Russia, South Africa, Brazil, Nigeria, Canada, and Cameroon. In 2016, the Secretariat sent 206 tweets and retweets and published 92 posts on Facebook. At the end of the year, IUSSP was followed by 817 people on its Twitter account and IUSSP Facebook page was liked by 733.

IUSSP participation in United Nations meetings

The IUSSP has Special Consultative Status as an NGO with the United Nations Economic and Social Commission (ECOSOC). This status gives IUSSP the privilege of participating in United Nations-sponsored meetings.

The IUSSP was selected as one of the 25 organizations to serve on the Steering Committee set up to prepare the United Nations Summit for Refugees and Migrants. Between June and August 2016, Ellen Kraly (Colgate University) and Mohammad Jalal Abbassi-Shavazi (University of Tehran) participated in a series of meetings to draft the concept note for the Informal Interactive Multi-stakeholder Hearing on 18 July and to develop recommendations to the Office of the President of the General Assembly regarding representatives of civil society organizations to participate in the meetings. Ellen Kraly made a statement during the fourth panel concerning international migration. For more information: <u>http://iussp.org/en/unsummit-refugees-and-migrants</u>.

IUSSP participation in regional and national population conferences

In 2016, the IUSSP held exhibit booths and/or organized sessions and side meetings at four population conferences:

- **2016 Annual Meeting of the Population Association of America (PAA)**, Washington DC, 31 March-2 April 2016.
- XIX^e colloque international de l'Association Internationale des Démographes de Langue Française (AIDELF), Strasbourg, France, 21-24 June 2016.
- **2016 European Population Conference,** Mainz, Germany, 31 August-3 September 2016.
- VII Congress of the Latin American Population Association (ALAP) jointly organized with the XX Congress of the Brazilian Population Association (ABEP), Foz do Iguaçu, Brazil, 17-22 October 2016.

Membership and governance

As an association based on individual membership, the IUSSP's principal strength is its members. The majority of IUSSP activities are carried out through members' voluntary contributions of their expertise and time. At the end of 2016, the IUSSP had 1,288 full members and 345 student associates from 121 countries and representing 120 nationalities. In 2016, 82 new members and 232 new student associates joined the Union. Women comprise 42% of full members and 41% of the student associates.

New dues levels

The IUSSP Council decided to reevaluate membership dues, which had not been changed since 2006. On 30 March 2016, the regular annual dues increased from 90 to 100 euros. Reduced and very low dues increased proportionally. The Council decided not to increase the rate for members making one payment to cover 4 years of membership to encourage members to remain members in between conferences. For more information: http://iussp.org/en/membership-dues-changes-30-march-2016.

2017 Council elections-Committee on Nominations' report

Following the procedure outlined in the IUSSP Constitution (article 11), the Committee on Nominations prepared a list of candidates for the 2017 election ballot to decide on the 2018-2021 Council. IUSSP members have been invited to make additional nominations. For more information

and to read the Committee on Nominations' report: <u>http://iussp.org/en/nominations-2017-council-elections</u>.

IUSSP membership survey

The IUSSP Secretariat carried out an online survey of current and past members from 17 June to 21 August. The objectives of the survey were to consult the membership, as part of a reassessment of Union's priorities and activities, to understand membership renewal behaviour and dynamics, seek feedback and suggestions on how to improve communication and services and expand membership, especially by attracting young demographers. The survey was sent to 5,658 contacts. A total of 1,537 current and former members and students responded. The response rate for current members was 51% and for current student associates 44%; for former members and students it was 20%. The survey report is available on the IUSSP website: https://iussp.org/sites/default/files/2016_IUSSP_membership_survey.pdf.

IUSSP Laureate award

The IUSSP Council elected Ron Lee to be the 2016 IUSSP Laureate in recognition of his outstanding contributions to the advancement of population sciences and distinguished service rendered to the IUSSP. The Laureate award ceremony took place at the Annual Meeting of the Population Association of America in Washington, DC on 30 March 2016 and included a Symposium on Ronald Lee's contributions to demography chaired by Jacques Vallin, with presentations by David Lam, Andrew Mason, and Jennifer Johnson-Hanks. For more details: http://iussp.org/en/2016-laureate-ceremony-ron-lee.

Review of IUSSP's business plan and fundraising strategy

In early 2016, the IUSSP received an Organizational Effectiveness Grant from the William and Flora Hewlett Foundation to help the Union reassess its business, fundraising and communications strategy. This comes at a time when the Union is facing difficulties in securing core and project funding from government sources and donors such as UNFPA. While the IUSSP also receives income from membership dues and conference registration fees, this revenue is not sufficient to support current operational costs. The IUSSP must diversify its funding sources and develop a sustainable business plan to ensure the long-term viability of the Union and its activities.

The IUSSP hired Ethicore, a consulting agency based in the United Kingdom. As part of their consultancy, Ethicore examined IUSSP finances and activities and held stakeholder interviews with donors and members. The membership survey sent to members during the summer provided the consultants with useful information for future directions and activities. Ethicore completed their preliminary report and recommendations in July and the IUSSP Council vetted those recommendations in September. Ethicore noted IUSSP's solid international reputation for promoting quality demographic research through its members, scientific panels, and seminars and conferences, but that the IUSSP needed to do more to heighten awareness of the Union and population research. They recommended that the IUSSP become more proactive, promoting the field of population by focusing on policy-relevant topics and working across disciplinary boundaries to make the relevance of demography and population research more visible to those outside the discipline. For more information on Ethicore's key recommendations: http://iussp.org/en/ethicore-recommendations-iussp

Management and finances

In 2016, the IUSSP incurred a deficit of \notin 114,041; IUSSP income totaled \notin 517,220 the operating budget was \notin 631,261.

Income: IUSSP income totaled \notin 517,220. Income sources include grants from private foundations and governments to support scientific activities and operational costs (\notin 205,024) membership dues (\notin 59,523), and income from interest earned on investments and exchange rate gains. In addition, \notin 185,075 in tied funds for multi-year grants awarded in 2014-2015 was expended for specific projects. In addition to the direct support received from donors and institutions for operations and scientific activities, the IUSSP leverages additional funds through Panel members and their institutions, which are not included in our accounts.

Expenses: The IUSSP operating budget for 2016 was $\in 631,261$. Expenses include: $\in 157,297$ to directly support IUSSP scientific and training activities which includes preparation for the 2017 International Population Conference, $\in 40,487$ for publications and the website including expenses related to the publication and distribution of the IPC2017 Call for Papers and N-IUSSP the new online IUSSP news magazine, and $\in 45,323$ in grant funds mainly from the William and Flora Hewlett Foundation that have been advanced for activities taking place in early 2017. Overall there was a significant drop again in funding from donors for IUSSP scientific activities.

The IUSSP spent €250,583 on salary costs and related taxes and social security costs. Accounting and auditing services, office furnishing and supplies, depreciation on assets and other office expenditures amounted to €46,294. IUSSP governance costs came to a total €53,775 and includes expenses associated with IUSSP Council and Bureau meetings, outreach to regional associations, as well as consultant costs related to a review of the IUSSP business, fundraising and communications plans. The IUSSP also incurred costs of €33,333 in exchange rate losses.

Reserves: The IUSSP incurred a deficit of €114,041, which is covered by IUSSP general and project reserve funds. As of 1 January 2017, IUSSP reserves stand at €1,633,191. The 2016 deficit was covered by the following reserves: €10,000 was deducted from the IUSSP reserve for General Operating Costs to cover the consultant costs associated with the review of the IUSSP fundraising and business plan leaving a reserve of €120,000; €104,040 was deducted from the reserve for the International Population Conference to cover most costs related to the organization of Conference which amount to €129,230 half of which include IUSSP Secretariat staff time devoted to planning and coordination of the Call for Papers leaving €462,110 in the reserve.

Member Donations: The IUSSP Council has established two new funds to allow members who wish to provide funds for a specific use to do so: a Travel Fund for junior demographers and developing country scholars and a Translation Fund to support translation and simultaneous interpretation costs to better include non-English speaking population scientists in IUSSP activities. A total of $\leq 1,519$ was donated to the General Fund.

Investments: The assets of the IUSSP are held in several secure investments. At the end of 2016, the IUSSP re-invested the interest and principal of a BFCM bond of \notin 250,000 that matured in 2016 and funds from its USD account and Euro SICAV accounts that were earning very low interest in two mutual funds managed by CIC Banque Transatlantique – one in USD (USD150,000) and one in Euro (\notin 400,000) which earned \notin 15 447.94. In addition, the capital investment subscribed at the end of 2010 (\notin 500,000) resulted in interest earnings in

2016 €10,432.85. The IUSSP also has U.S. dollar account with Banque Transatlantique and with Tompkins County Trust Bank in New York, USA. Total interest earned on investments and other exceptional gains in 2016 is €28,166.

Staff: The Secretariat currently has four permanent staff members who coordinate IUSSP scientific activities and publications, communicate with IUSSP members, donors and the public, maintain a website, and coordinate fundraising and reporting to IUSSP donors. In 2016, Marina Boragno was recruited away and replaced by Adelaide Twumasi who joined the Secretariat as the new financial and administrative assistant in September 2016.

Auditor: The IUSSP 2016 audited accounts were prepared by the accounting firm ARICE and approved by auditors Mazars & Guérard. For further details on IUSSP revenue and expenses in 2016 see the Statement of Activities and Change in Net Assets for the Year Ended 31 December 2016. Comparable data for 2013-2016 are shown in that statement. The Statement of Financial Position as of 31 December 2016 shows IUSSP total assets and liabilities for the period 2013-2016.

Donors: In 2016, the IUSSP received support from a number of governments, private foundations and other agencies, including the Government of France, The William and Flora Hewlett Foundation, and other donors. In addition to its financial support, the French Institute for Demographic Studies (INED) provides office space and numerous services to the IUSSP. Several members of the IUSSP made generous gifts to the organisation in 2016. IUSSP gratefully acknowledges the support of these institutions and individuals.

Annex 5: Summary table of 2016 IUSSP scientific and training meetings

Workshop: Communicating on the Demographic Dividend for policy makers and journalists, Mbalmayo, Cameroon, 24 March 2016

The workshop, held at the Hotel Departmental Mbalmayo, was organized by the IUSSP Network for Strengthening Demographic Training in Francophone Africa (FraNet) in collaboration with the Cellule d'Appui à la Recherche et à l'Enseignement des Institutions Francophones d'Afrique (CARE-IFA) and the Institut de Formation et de Recherche Démographiques (IFORD) and with financial support from The William and Flora Hewlett Foundation. This workshop is part of initiative to raise policymakers' awareness of the demographic dividend and its implications for the economic emergence of African countries. In addition to the five facilitators, the workshop brought together 35 participants based in Cameroon: policy makers working for the government or for international organizations, journalists, and researchers and students at IFORD. This workshop builds on a series of training workshops held in the past 3 years on the analysis of the demographic dividend in Africa. The workshop's main objective was to popularize the concept of demographic dividend to policy makers and journalists to facilitate its national ownership. The workshop also addressed the issue of measuring the demographic dividend by focusing on decomposition methods applied particularly to the schooling and economic dividends. For a http://iussp.org/en/atelier-de-communication-sur-le-dividende-demographiquefull report: mbalmayo-mars-2016-en.

Training workshop: Social media and demographic methods, Washington, DC, United States, 30 March 2016

This training workshop was organized by the IUSSP Scientific Panel on Big Data and Population Processes at the 2016 Annual Meeting of the Population Association of America (PAA), with support from the William and Flora Hewlett Foundation to the PAA. Nearly 150 participants registered to attend this half-day workshop focused on accessing social media data and analyzing them using demographic methods. The workshop provided an introduction to tools such as Application Programming Interfaces (APIs) for collecting data from social media (e.g., Twitter and Facebook), and offered examples of demographic methods that could be used to gain insights from these data. In order to encourage interaction among scholars and students interested in the emerging field of digital demography, the second part of the workshop featured lightning talks by researchers in the field. Several presenters also offered a more conceptual view of the relation between digital data sources and traditional demographic data and techniques. A mailing list was set up after this workshop to facilitate communication among researchers interested in web data, social media data and demography. For a full report: http://iussp.org/en/training-workshop-social-media-and-demographic-methods-paa-2016.

Expert meeting: Towards the next generation of record-linkage studies to advance data quality assessment of civil registration systems in low- and middle-income countries, Washington, DC, United States, 4-5 April 2016

This expert group meeting was organized by the IUSSP Scientific Panel on Innovations in Strengthening Civil Registration and Vital Statistics (CRVS) Systems, in collaboration with the World Bank Group and the Population Association of America (PAA) and hosted at World Bank headquarters in Washington, D.C. The meeting was supported through a grant from the William and Flora Hewlett Foundation to the PAA. The meeting's focus was on the use of direct demographic estimation methods that draw on record-linkage techniques, to assess the completeness and quality of CRVS systems. The meeting's objectives were three-fold: 1) to document and share lessons learned from recent record linkage studies; 2) to

strategize about the design and implementation of such record linkage studies in low-income and middle-income countries; and 3) to facilitate new record linkage projects in 2-3 countries that have well-developed CRVS improvement plans. The meeting brought together a diverse group of 35 researchers and practitioners from Australia, Canada, Egypt, France, Lebanon, New Caledonia, Palestine, Philippines, Switzerland, South Africa, United Kingdom, and the United States. For a full report: http://iussp.org/en/towards-next-generation-record-linkage-studies.

Workshop: Social media and demographic research: applications and implications Cologne, Germany, 17 May 2016

This research workshop was organized by the IUSSP Scientific Panel on Big Data and Population Processes at the 10th International AAAI Conference on Web and Social Media (ICWSM-16). The workshop was supported by grants from the William and Flora Hewlett Foundation to the IUSSP and the Population Association of America (PAA). The goal of the workshop was to bring together population researchers and data scientists to discuss the applications and implications of social media for demographic research, and foster communication between these two communities. Fifteen presenters - demographers, sociologists, computer scientists - shared their research. A number of presentations offered promising approaches e.g. for tracing migration patterns and measuring flows of migrants between countries, while taking advantage of the new potential that social media can offer (real-time, availability in data-poor environments, insight into opinions and beliefs, etc.). They also proposed techniques for matching digital data with census and survey data. Several presentations also took a deeper look at how these models can fail, creating or reinforcing bias. The workshop ended with an engaging roundtable discussion, with particular focus on which real-world problems this emerging field can hope to address, and what IUSSP and other professional organizations can do to help advance these research goals. For a full report: http://iussp.org/en/exploring-applications-and-implications-social-media-and-demographic-research.

Seminar: Registering and counting the population: the production and exploration of census information from early modern times to the end of the 20th century, Campinas (São Paulo), Brazil, 19-21 May 2016

This seminar was organized by the IUSSP Scientific Panel on Historical Demography, in collaboration with the Graduate Program of Demography and the Department of Demography - University of Campinas, the Brazilian Population Studies Association (ABEP) and the Population Studies Center (NEPO), with financial support from the São Paulo Research Foundation (FAPESP), the National Council for Scientific and Technological Development (CNPq), the Brazilian Federal Agency for Support and Evaluation of Graduate Education (Capes), and the Brazilian Population Studies Association (ABEP). The aim of the seminar was to stimulate the discussion of original research dealing with the process of producing censuses and vital statistics over time and in different places. The seminar programme consisted of 21 presentations by demographers and historical demographers, economic and social historians, sociologists and anthropologists from North American, European, Latin American and Asian universities. The studies presented were conducted at a variety of geographic scales going from entire countries (or even colonial empire), to regions or cities using data from Argentina, Brazil, Canada, Denmark, France, India, Portugal, Russia, Turkey. In addition to the authors, the seminar was attended by some 30 researchers, graduate and undergraduate students in Demography, History and other Social Sciences, who attended a one-day training workshop devoted to Demographic and Statistical analysis with Census and longitudinal Data organized on 18 May. For a full report: http://iussp.org/en/iussp-seminarregistering-and-counting-population-sao-paulo-may-2016.

Expert meeting: The challenges of demographic data in Sub-Saharan Africa in the framework of the Sustainable Development Goals (SDGs), Paris, France, 31 May 2016. The meeting was organized by DEMOSTAF (Demography Statistics for Africa), the IUSSP & the French Institute for Demographic Studies (INED) and hosted at INED. The meeting benefited from financial support from the William and Flora Hewlett Foundation. In 2015, the Sustainable Development Goals (SDGs) succeeded to the Millennium Development Goals (MDGs). In order to monitor progress towards SDG targets, a specific attention is given to improve the quality, availability and access to data and statistics disaggregated by various characteristics: income, gender, age, geographic location. Urgent steps should be taken to ensure that no one is left behind. This is why the post-2015 agenda is closely linked to the "Data Revolution", an international initiative that aims to improve the quality of statistics as well as information available to citizens. The aim of this scientific meeting was to give an overview of the different challenges related to demographic data in Sub-Saharan Africa in the framework of the SDGs and identify levers to overcome these constraints. Ten speakers from a variety of backgrounds were invited to present their different perspectives on this topic. The meeting was attended by some 50 participants from all different regions in Africa but also from Europe and North America. Presentations were made in English or in French and simultaneous translation was available in both languages. The meeting was video-recorded in both soundtracks. For a full report: and the videos can be accessed http://iussp.org/en/demographic-data-sub-saharan-africa-sdgs.

Seminar: Medication abortion: availability and use, and impact on abortion safety and women's health, Dakar, Senegal, 6-8 July 2016

The seminar was organized by the IUSSP Scientific Panel on Abortion Research and the Population Council-Dakar Office, with technical and financial support from STEP UP (Strengthening Evidence for Programming on Unintended Pregnancy) Research Consortium, funded by UK aid from the UK Government, as well as financial support from the Netherlands Ministry of Foreign Affairs, Bixby Center for Population Health and Sustainability, University of California, Berkeley and the Centre Population et Développement (CEPED), France. The seminar brought together 29 participants from all regions of the world and included both senior and junior scholars, including a few at the predoctoral stage. The meeting provided an opportunity for researchers to present results from on-going studies on the use of medication abortion for termination of pregnancy in a range of legal contexts. The 14 papers that were presented at the seminar addressed use of misoprostol alone (less effective but available in many legally restrictive settings) as well as use of the combined medication abortion method (mifepristone combined with misoprostol, highly effective and available only where abortion is permitted under broad criteria). In addition, there were two panel sessions, one focused on priority research questions in this area and the other on promising methodological approaches for research in this area. For a full report: http://iussp.org/en/iussp-seminar-medication-abortion-dakar-july-2016.

Workshop: Completion of volumes on the Demographic Dividend linked to Education and the Economy, Ouagadougou, Burkina Faso, 25-27 July 2016

The workshop was organized by the IUSSP Network for the Strengthening of Demographic Training in Francophone Africa with financial support from the William and Flora Hewlett Foundation and aimed to complete work on two volumes covering the educational and economic dividend. It was hosted by the Institut Supérieur des Sciences de la Population (ISSP), Université de Ouaga I Pr Joseph Ki-Zerbo. African governments and international institutions consider the demographic dividend to be a development opportunity for Africa. However, the interpretation of the concept, its measurement and the conditions of its realization as well as its benefits remain obscure to many. In this context the network has mobilized its members to provide a reference volume on the demographic dividend. The workshop brought together eleven members of the network working on chapters in the volumes devoted to the educational and economic dividend. The principal objective of this workshop was to review the chapters for these two volumes as well as consider a new volume that would be entitled "50 questions about the demographic dividend". The new volume would address recurring questions of the scientific community, policy makers and the general public with regards to: understanding the concept of the demographic dividend, measuring the dividend, and explaining the conditions under which countries can expect to reap benefits from a demographic dividend. For a full report: http://iussp.org/en/atelier-de-finalisation-des-livres-sur-le-dividende-ouagadougou-juillet-2016-en.

Training workshop: Web, social media data and demographic research, Mainz, Germany, 31 August 2016

This training workshop was organized by the IUSSP Scientific Panel on Big Data and Population Processes at the 2016 European Population Conference, with support from the William and Flora Hewlett Foundation. Some thirty participants attended this half-day workshop, which focused on building an integrated workflow for accessing social media data, analyzing them using demographic methods, and creating interactive data visualizations. It provided an introduction to tools such as Application Programming Interfaces (APIs) for collecting data from social media (e.g., Twitter), programmable data visualizations, and offered examples of demographic methods that could be used to gain insights from social media data. The first part of the workshop offered an introduction to tools for gathering social media data and for extracting demographic characteristics from profile pictures (e.g., the Face++ API). In the second part, the trainers presented a series of hands-on tutorials about gathering data with the Twitter Streaming API and creating data visualizations with R. Participants followed a walk-through on their own laptops, using R code and datasets that were distributed in advance, as well as data collected in real-time during the workshop. For a full report: http://iussp.org/en/training-workshop-web-social-media-data-and-demographicresearch-epc2016.

Seminar: Causal mediation analysis in health and work, Rostock, Germany, 26-29 September 2016

This seminar, preceded by a three-day training course, was organized by the IUSSP Scientific Panel on Pathways to Health in collaboration with and hosted by the Max Planck Institute for Demographic Research (MPIDR). The seminar and course were held with financial support from the IUSSP, MPIDR, the Centre for Economic Demography - Lund University, and the Department of Demography - Université de Montréal. The course and seminar brought together 27 junior and senior researchers working at the intersection of labour market participation, retirement, and health and aimed to shed light on the life-course processes that influence labour market performance and older-age health. The first three days were devoted to a course on causal mediation analysis, which consist in assessing the mechanisms and pathways by which causal effects operate. The course was taught by Professor Tyler VanderWeele (Harvard University). He covered recent developments in causal mediation analysis and provided practical tools to implement these techniques. On the fourth day, the group moved on to the presentation workshop with twelve papers on life-course, health and work. The presentations analysed health conditions and labour market performance in older ages, focusing not only on contemporary conditions, but also on conditions over the life course, beginning in early childhood. For a full report: http://iussp.org/en/causal-mediationanalysis-health-and-work.

Training workshop: Social Media and Demographic Methods, Foz do Iguaçu, Brazil, 17 October 2016

This training workshop was organized by the IUSSP Scientific Panel on Big Data and Population Processes at the 2016 joint congress of the Latin American Population Association (ALAP) and the Brazilian Association for Population Studies (ABEP), with support from the William and Flora Hewlett Foundation. The workshop was similar to those organized earlier in the year at the Annual Meeting of the PAA and at the European Population Conference. It focused on accessing social media data and using demographic methods to analyze this data. It provided an introduction to tools such as Application Programming Interfaces (APIs) for collecting data from social media (e.g., Twitter tweets and Facebook public pages), and offered examples of demographic methods that could be used to gain insights from these data (e.g., estimating Twitter growth rate from a cross-section of tweets). Some 60 participants from a variety of disciplines and countries in Latin America attended the morning lectures and participated in a hands-on lab about collecting and analyzing social media data using the R programming language for statistical computing. In the afternoon, one-on-one meetings were organized and led to stimulating exchanges. For a full report: http://iussp.org/en/training-workshop-social-media-and-demographic-methods-2016-alap.

Side meeting and round table: Civil registration and vital statistical assessment, Foz do Iguaçu, Brazil, 18 and 20 October 2016

A side meeting on the "Assessment of civil registration and vital statistics using direct methods" and a round table on "Academic Perspectives on the Evaluation of Civil Registration and Vital Statistics" were organized by the IUSSP Scientific Panel on Innovations for Strengthening Civil Registration and Vital Statistical Systems at the 2016 joint congress of the Latin American Population Association (ALAP) and the Brazilian Association for Population Studies (ABEP), with support from the William and Flora Hewlett Foundation. Their aim was to showcase recent methodological developments and foster an exchange of experiences from Latin America on how to best assess the completeness and accuracy of birth and death statistics, which are key indicators of CRVS system performance. These meetings brought together specialists and experts involved with the development and/or the application of direct methods, especially through the use of record linkage validation for assessing the completeness and accuracy of births and deaths records based on data from civil registration and other administrative and health sources, at national or local levels. For a full report: <u>http://iussp.org/en/meetings-civil-registration-and-vital-statistical-assessment-2016-alap</u>.

Round table: Web and Social Media for Demographic Research, Foz do Iguaçu, Brazil, 19 October 2016

This round table was organized by the IUSSP at the 2016 joint congress of the Latin American Population Association (ALAP) and the Brazilian Association for Population Studies (ABEP), with support from the William and Flora Hewlett Foundation. Its aim was to present the Data Revolution and implications of web and social media data for demographic research and to discuss these with an audience of population scholars from the Latin American. Five topics were presented, followed by remarks from the discussant, and questions from the floor. Presenters insisted on some the challenges, which include the training required for their use, confidentiality issues, data validation issues, and the comparability of this data with the information that is obtained from traditional data. For a full report: http://iussp.org/en/round-table-web-and-social-media-demographic-research-2016-alap.

Workshop: Web, social media, and cellphone data for demographic research, Bellevue, United States, 14 November 2016

This research workshop was organized by the IUSSP Scientific Panel on Big Data and Population Processes at the 12016 Social Informatics conference (SOCINFO) and was supported through a grant from the William and Flora Hewlett Foundation to the Population Association of America (PAA). This activity built on previous initiatives (e.g., the demography and social media workshop at ICWSM 2016) aimed at connecting demographers and data scientists. The workshop brought together a group of about 25 students and scholars from a number of disciplines, including demography, computer science, statistics, geography, and sociology. Participation from members of both the academia and the industry led to lively and engaging conversations. Andreas Gros, a researcher in the Connectivity Lab at Facebook, gave a keynote speech about "Mapping the World Population using Artificial Intelligence". Andreas Gros's presentation coincided with the first public release of the "High Resolution Settlement Layer" maps for Ghana, Haiti, Sri Lanka, Malawi and South Africa.

The keynote talk was followed by three sessions that dealt with, respectively, "Twitter data for Demographic Research", "Combining Traditional and New Data Sources" and "Social Networks and Demographic Research". For a full report: <u>http://iussp.org/en/web-social-media-and-cellphone-data-demographic-research-socinfo-2016</u>.

Session: Advancing the Data Revolution through record linkage and data integration, Abu Dhabi, United Arab Emirates, 6 December 2016

This invited session was organized by the IUSSP Scientific Panel on Innovations in Strengthening Civil Registration and Vital Statistics Systems at the 15th Conference of the International Association for Official Statistics (IAOS). This initiative was part of the IUSSP's efforts to facilitate contributions by demographers to the 2030 development agenda's data revolution. The session was attended by 42 participants The focus of the session was to explore the potential of record linkage methods to improve subnational mortality estimates in low- and middle-income by utilizing multiple incomplete sources of data in concert with incomplete vital registration data. Three papers were presented. Fritz Scheuren (NORC, University of Chicago) provided a historical and theoretical overview of the application of record linkage to improve official demographic statistics. Ching Choi (University of New South Wales) discussed recent lessons learned from applying record linkage methods to improve mortality estimates for indigenous Australians. Romesh Silva (UN-ESCWA) reviewed some of the recent lessons-learned in applying record linkage methods to mortality data in low- and middle-income countries. These papers along with a selected papers presented at a previous workshop are being prepared for publication in a special issue on record linkage and vital registration to be published by the Statistical Journal of the International Association of Official Statistics. For a full report: http://iussp.org/en/advancingdata-revolution-through-record-linkage-and-data-integration.
