3-PANEL MINI-CONFERENCE

ON

Family Planning, Fertility and Urban Development,

Contraceptive Transition Theories: Models for Contemporary Patterns of Use

Unintended Pregnancy and Key Outcomes: Improvements in Measurement and New Evidence

This mini conference brings together approximately 80 scholars, policy experts, and donors from around the globe to meet to present and discuss the latest research by IUSSP scientific panels and next steps for future research on key topics related to family planning.

The event is funded by grants made to the IUSSP from the Bill & Melinda Gates Foundation to support the work of three IUSSP Scientific Panels whose mandates are to further knowledge on policy-relevant research for urban family planning, unintended pregnancy measures and population-level contraceptive transitions.

The conference will support each panel in furthering their own research agenda and in leveraging the work and perspectives of the other panels and providing key discussion and networking opportunities for established and early career population scientists from across the globe engaged in family planning and reproductive health research.

A key focus will be on engaging the cohort of early career fellows conducting research to engage with urban policy makers on family planning and urban development in sub-Saharan Africa.

14:00 - 15:30	CLOSING PLENARY Research Priorities: Lessons from the Conference Chair: Tom LeGrand Speakers: Alex Ezeh, Rishita Nandagiri, Ilene Speizer, Susana Cavenaghi	Each speaker will make recommendations about future research - priority topics, data gaps to be filled - drawing from their participation in the many conference sessions during the preceding three days. This will be a distillation of the implications for future research that emerged in the separate sessions of each of the three panels. Priorities shared by all three panels will be highlighted, and differences as well (anticipated, because of the different nature of the panels' missions). Floor discussion will debate the relative importance that should be attached to the various recommendations that have been submitted.
15:30 - 16:00	Coffee Break	End of Conference - Participants are free after the plenary

International Union for the Scientific Study of Population (IUSSP)

Established in 1928, the IUSSP is a professional association that brings together over 2,000 researchers, scholars, students, policy makers and others from 140 countries and from diverse disciplinary and professional backgrounds to cooperate on a wide range of population issues underpinning economic, human and social development.

The IUSSP's main goal is to "foster relations between persons engaged in the study of demography in all countries of the world, and stimulate interest in demographic matters among governments, national and international organizations, scientific bodies and the general public".

To further its mission, the IUSSP:

- organizes seminars and workshops to further scientific knowledge;
- organizes training and distance-learning activities to improve the research capacity;
- organizes the International Population Conference every four years to bring together world specialists in the field;
- publishes outcomes of its scientific activities in a variety of publications, aimed at a scientific audience, policy makers or for the general public;
- maintains a website, to help its members collaborate in a variety of ways and to provide population information for a general audience.

Associação Portuguesa de Demografia

Associação Portuguesa de Demografia (APD)

Founded in September 2000, the Portuguese Association for Demography is a non-profit scientific association whose main objectives are the following:

- promote the development of demography and population studies;
- encourage and disseminate demographic studies, in particular those relating to the Portuguese population;
- encourage research and stimulate scientific communication and debate;
- promote the integration of Portuguese demographers in the international population community;
- promote the professional activity of demographers;
- communicate the contributions of population studies to institutions and public opinion;
- foster the relationship with other disciplines.

The Portuguese Association for Demography is open to all who are interested in the development of demography in Portugal.

The VI Portuguese Demography Conference will be held in Lisbon on 13-14 October 2022 on the theme of "demographic (in)sustainability".
