

PLANIFICATION FAMILIALE

Le Partenariat de Ouagadougou

IUSSP Webinar

Why do we measure what we do

31 May 2023

Dr Fatou Kiné Wathie,

Senior Technical Operations Manager_ OPCU

The Ouagadougou Partnership (OP)

- **French-speaking West Africa:** Benin, Guinea, Burkina Faso, Togo, Niger, Mauritania, Mali, Senegal, Côte d'Ivoire
- The OP was set up to **reposition family planning**
- The OP is based on two principles:
 - ✓ **better donor coordination** to maximise support for countries
 - ✓ National and regional **collaboration and cooperation** to meet **unmet needs in family planning**

Our vision is of a French-speaking West Africa where easy access to **quality family planning saves and improves the lives of women and young people** and acts as a catalyst for sustainable development for all.

Demand indicators and their success

- mCP +++, new users, unmet needs, continuation/discontinuation, ...: barometers of healthcare system actions,
- As advocacy tools, they help to coordinate and motivate the various players and facilitate the mobilisation of stakeholders,
- Its successes can have an impact on the human rights of young people and women, maternal and infant mortality, and a number of worrying morbidities such as obstetric fistulas and malnutrition.
- However, a number of challenges (completeness) have been noted in our countries in connection with the routine data collection method used to estimate the annual results between two Demographic and health surveys.
- Ex: Mali, 52% collection rate

Some limitations noted ...

- mCP, several data collection measurement systems, there are challenges regarding the completeness, promptness and traceability of the data.
- Greater harmonisation and coordination of data would increase recognition of the efforts made and also of the real results achieved.
- A few other items of information would be interesting to track:
 - ✓ Indicators of fertility needs;
 - ✓ Involving men in FP;
 - ✓ Disaggregated discontinuation rates: those linked to the wife's intention and those linked to other / husband, ...

THANK YOU
