

IUSSP Bulletin • Issue 36, June 2017

In this issue: 2017 Elections for Council and Committee on Nominations • Constitutional revision • 2016 Annual Report • International Population Conference • IUSSP contributions to UN migration and refugee compacts • Data Revolution activities • African Francophone Network • Population-Environment activities • Seminars and workshops • News from the members • Regional population associations • Other announcements • N-IUSSP • Calls for papers • Training opportunities • Job opportunities • Calendar

Elections 2017

Elections for Council members and officers will take place online from 30 July to 1 October 2017. This year, IUSSP members are also invited to select candidates for the 2021 Committee on Nominations. The electoral list will include all (full) members in good standing as of 30 June. ([read more](#))

Constitutional revision

A proposal to amend the Constitution will be presented to members shortly. Its aim is to clarify certain definitions and procedures, introduce several items following suggestions from the membership survey or from consultants, and make it easier for the IUSSP to adapt to an ever faster changing environment. ([read more](#))

2016 Annual Report

IUSSP's Annual Activities and Management Report for 2016 is now available on the IUSSP website. [Read the 2016 Annual Report.](#)

IPC 2017

IPC2017 scientific programme

The International Organizing Committee met on 13-14 April and approved the preliminary scientific programme. All those interested in population research are now invited to register to attend IPC 2017 in Cape Town, 29 October-4 November 2017. ([read more](#))

Sponsored Research Leader Sessions

As a means to raise funds for the conference, the IUSSP has offered organizations working in the population field the opportunity to organize sessions to highlight research carried out or supported by their institution. Note that there are still a few slots available. ([see list](#))

Simultaneous translation in Cape Town

To allow all our colleagues, especially students and researchers from Francophone Africa, to fully benefit from the Conference, donate to the Fund set up for Simultaneous Translation. ([read more and donate!](#))

IUSSP & the United Nations

IUSSP contributions to UN migration and refugee compacts

In adopting the New York Declaration in September 2016, Member States of the United Nations agreed to develop a global compact for safe, orderly and regular migration. IUSSP Members are encouraged to contribute their expertise. ([read more](#))

Data Revolution activities

Recent research and training workshop

The IUSSP Scientific Panel on Big Data and Population Processes recently organized workshops at the PAA in Chicago, at the World Wide Web Conference in Perth, and at International AAAI Conference in Montreal. Their common goal was to foster collaboration between demographers and computer scientists. ([read more](#))

Tutorial on Digital Demography at IC2S2

The IUSSP Scientific Panel on Big Data and Population Processes will run a Tutorial on Digital Demography on 10 July at the 3rd Annual International Conference on Computational Social Science in Cologne, Germany. ([read more](#))

African Francophone Network

50 Questions on the Demographic Dividend

The IUSSP Network on Strengthening Demographic Training in Francophone Africa held a workshop on 31 March in Yaoundé to seek feedback from specialized journalists to finalize the volume *"50 Questions on the Demographic Dividend in Africa"* and further increase the journalists' understanding of the demographic dividend. ([read more](#))

Population-Environment activities

Culture, belief systems, values, and the environment

The Population-Environment Research Network (PERN) held a cyberseminar on culture, belief systems, values, and the environment from 15 to 26 May 2017. The cyberseminar was kicked off with a webinar on 15 May, hosted by Future Earth. [Watch the webinar video](#) and [read the background paper, expert contributions and postings](#).

IUSSP seminars and workshops

Mortality analysis and forecasting

The IUSSP Scientific Panel on Lifespan Extension with Varying Cause-of-death Trajectories organized a seminar on Mortality Analysis and Forecasting in New Delhi, India, 6-7 April 2017. ([read more](#))

Subjective well-being and demography

The IUSSP Scientific Panel on Subjective Well-being and Demographic Events organized a workshop on 26 April 2017 at the PAA Annual Meeting in Chicago focused on integrating subjective well-being in the demographic research agenda. ([read more](#))

News from the members

Membership survey results

A summary report on the membership survey which was conducted online from 17 June to 21 August 2016 is now available on the IUSSP website. [Read the membership survey report.](#)

Members' new publications

- *Assisted Reproductive Technologies in the Global South and North Issues, Challenges and the Future*, edited by Virginie Rozée and Sayeed Unisa.
- *Intimate Interventions in Global Health: Family Planning and HIV Prevention in Sub-Saharan Africa*, by Rachel Sullivan Robinson.
- *Generaciones, cursos de vida y desigualdad social*, coordinated by Marie-Laure Coubès, Patricio Solis and Maria Eugenia Cosio Zavala.

([read summaries](#))

New IUSSP members

234 new members and 284 new student associates joined the IUSSP between 1 March and 1 June 2017. ([see list](#))

In memory

- **Godelieve Masuy-Stroobant** (1948 - 2017).

Regional population associations

2017 PAA Annual Meeting in Chicago

The IUSSP organized two pre-conference workshops and had an exhibit booth at the 2017 Annual Meeting of the Population Association of America (PAA), which was held in Chicago, 27-29 April. ([read more](#))

2018 European Population Conference

The 2018 European Population Conference will be held at Vrije Universiteit Brussel, in Belgium, 6-9 June 2018. EPC 2018 is a general population conference with a focus next year on "Population, Diversity and Inequality".

Deadline for submissions: 1 Oct 2017. ([read more](#))

2018 APA Conference in Shanghai

Online submissions are now open for the 4th Asian Population Association (APA) Conference, which will be held in Shanghai, China, 11-14 July 2018. Deadline for submissions: 30 Sept 2017.

Calls

IUSSP calls for papers

- IUSSP Seminar on Pandemics: Reflections on the Centennial of the 1918 Spanish Influenza Virus, Madrid, Spain, 27-29 November 2017. Deadline for submissions: 30 June 2017.
-

Other calls for papers

- Annual Meeting of the Southern Demographic Association (SDA) in Morgantown, United States, 25-27 Oct 2017. Deadline for submissions: 30 June 2017.
 - Adolescent Health and Development in Southern Africa: Implications and Post- 2015 Development Agenda. *South African Journal of Child Health*. Deadline for submissions: 1 Aug 2017.
 - 4th Asian Population Association (APA) Conference, Shanghai, China, 11-14 July 2018. Deadline for submissions: 30 Sept 2017.
 - 2018 European Population Conference (EPC 2018), Brussels, Belgium, 6-9 June 2018. Deadline for submissions: 1 Oct 2017.
 - Special Issue of *International Journal of Population Studies*. Deadline for submission: 31 Oct 2017.
 - International Sociological Association, Joint Conference for the Research Committee on Family (RC06) & Population (RC 41) on the theme "Changing Demography–Changing Families", Singapore, 17-19 May 2018. Deadline for submissions: 1 Nov 2017.
-

Training opportunities

- 4th KOSTAT-UNFPA Summer Seminar on Population: Aging and NTA (Daejeon, Korea, 23-29 July; Demography with R (Busan, Korea, 30 July-5 Aug); Migration Analysis (Seoul, Korea, 6-12 Aug 12). Deadline for applications: 23 June 2017.
 - Call for workshop applications: Maternal, Neonatal, Child and Adolescent Health, South Africa, Johannesburg/Pretoria, South Africa, 18-22 Sept 2017. Deadline for applications: 30 June 2017.
 - Online Applied Demography programs to be offered by the Pennsylvania State University (Penn State). Deadline for applications: 1 July 2017.
 - Advanced STATA: Programming and other techniques to make your life easier, London School of Hygiene and Tropical Medicine, 6-10 November 2017. Fees: £1,315. Deadline for applications: 12 Oct 2017.
-

Job opportunities

Employment announcements

- Associate or Assistant Professor in Demography at Shanghai University. Applications will be received until position is filled.
 - Research Fellow/Senior Research Fellow, Chronic Disease Epidemiology, Monash University, Australia. Deadline for applications: 14 July 2017.
-

Research grants/fellowship/post docs

- Postdoc or pre-doctoral researcher, ERC project CORRODE, Goethe-University Frankfurt/Main, Germany. Deadline for applications: 27 June 2017.
 - Two-year post-doctoral fellowship on ageing, care and wellbeing at the Research and Expertise Centre for Survey Methodology (RECSM), Pompeu Fabra University, Barcelona, Spain. Deadline for applications: 30 June 2017.
 - Postdoctoral Research Associate, Global Aging and Community Initiative (GACI), Mount Saint Vincent University, Canada. Applications will be accepted until the position is filled.
 - Intern - Research Assistant - Social Sciences. U.N. Economic Commission for Africa. Addis Ababa, Ethiopia. Deadline for applications: 30 Dec 2017.
-

Calendar

Forthcoming IUSSP meetings & other events

- International Population Geography Conference, University of Washington, Seattle, United States, 29 June-1 July 2017.
- **(IUSSP) Tutorial on Digital Demography** at the 3rd Annual International Conference on Computational Social Science (IC2S2 2017), Cologne, Germany, 10-13 July 2017.
- **IUSSP Seminar on Urban Health Transformations**. Cambridge, United Kingdom, 11-12 July 2017.
- EAPS Health, Morbidity, and Mortality workshop on the theme of "Historical and contemporary trends in morbidity and mortality", Novosibirsk, Russia, 19-21 July 2017.
- Summer School "Demography, Human Capital and Economic Growth", Shanghai, China, 19-23 July 2017.
- International Conference on "Partner Relationships, Residential Relocations and Housing in the Life Course", Cologne, Germany, 27-29 July 2017.
- **IUSSP Seminar on Mortality: Past, Present and Future**, Campinas, Brazil, 7-9 Aug 2017.
- Conference on Global Need for Formal Child Care. Montreal, Canada, 11 Aug 2017.
- Annual Conference of the European Consortium for Sociological Research (ECSR2017). Milan Italy, 31 Aug-2 Sep 2017.
- BSPS Annual Conference 2017, Liverpool, UK, 6-8 Sept 2017.
- 25th annual workshop of the European Research Network on Transitions in Youth (TIY). Brussels, Belgium, 13-16 Sept 2017.
- Climate and Cities Conference 2017. Potsdam, Germany, 18-21 Sept 2017.
- International conference: Transnational families and divorce: revisiting marital break-up in times of global (im)mobilities. Nijmegen, Netherlands, 27-29 Sep 2017.
- 15th Meeting of the European Network for the Sociological and Demographic Study of Divorce. Antwerp, Belgium, 5-7 Oct 2017.
- Workshop on OBOR Strategy and Its Implications for International Migration and Socio-ecological Changes. Shanghai, China, 10-11 Oct 2017.
- SLLS Annual International Conference. Multidisciplinary Collaboration in Longitudinal and Lifecourse Research. Stirling, Scotland, United Kingdom, 11-13 Oct 2017.
- II International Congress - Cities through History: Society. Guimarães, Portugal, 18-20 Oct 2017.
- Workshop on (New-ish) Methods and Data for Exploring Group Inequalities. Bath, United Kingdom, 19-20 Oct 2017.
- Annual Meeting of the Southern Demographic Association (SDA) in Morgantown, United States, 25-27 Oct 2017.
- 11th World Congress on Adolescent Health: Investing in Adolescent Health - the Future is Now. New Delhi, India, 27-29 Oct 2017.
- **International Population Conference**, Cape Town, South Africa, 29 Oct-4 Nov 2017.

- European Congress on Family Science 2017. Vienna, Austria, 9-11 Nov 2017.
 - **IUSSP Seminar on Pandemics: Reflections on the Centennial of the 1918 Spanish Influenza Virus**, Madrid, Spain, 27-29 Nov 2017.
 - 43rd Quetelet Conference, 2017. The demography of refugees and displaced populations. Louvain-la-Neuve, Belgium, 29-30 Nov 2017.
 - International Sociological Association (ISA) Joint Conference for RC06 (Family) & RC41 (Population). Singapore, 17-19 May 2018.
 - European Population Conference 2018 (EPC 2018). Brussels, Belgium, 6-9 June 2018.
 - 4th Asian Population Association (APA) Conference. Shanghai, China, 11-14 July 2018.
 - 2018 World Social Science Forum. Kyushu University, Fukuoka, Japan. 25-28 Sept 2018.
-

Submit your announcements

Share news from your institution and region so that we can keep all IUSSP members informed about recent or forthcoming events and opportunities in the population field: conferences, jobs, post-docs, and research grants. Please send the information to contact@iussp.org and remember to include important dates for application deadlines (and photos when appropriate). For inclusion in the next Bulletin, please send information **by 1 September 2017**.

Council and Committee on Nominations Elections

Elections for IUSSP Officers and Council members for 2018-2021 will take place **from 30 July to 1 October 2017**. This year, IUSSP Members are also invited to select candidates for the 2021 Committee on Nominations (read below).

IUSSP election procedures

All current and confirmed members of the IUSSP have the right to vote. Student associates do not vote in the elections. The electoral list for both elections will include all (full) members in good standing by 30 June.

Elections are now organized via the Internet, using a secure external online voting company, eBallot (formerly Votenet Solutions), an Internet voting service that provides online voting for a large number of associations and companies. Before the vote opens on 30 July, members will receive an email with their username and password so that they can access the ballot and vote.

The electoral procedure will be controlled by an Election Committee composed of Géraldine Duthé, Ann Moore and Julio Ortega.

The rules governing IUSSP elections can be found in [Article 11](#) of the IUSSP Constitution.

Candidates for IUSSP Council

The Committee on Nominations nominated 2 candidates for each position on Council, including the two officer positions: the Vice President and the Secretary General and Treasurer. In the IUSSP Constitution, the Vice President succeeds to the President, who is therefore not elected directly. The ballot, however, will include a vote to elect the outgoing IUSSP President as Honorary President.

Members were also invited to nominate additional candidates for Council. One additional candidate was proposed (with the required number of members in support of his candidacy) and will be added to the ballot.

Candidates proposed by the Committee on Nominations:

Vice President (<i>President Elect 2022-25</i>) (1 seat, two nominees)	Wang Feng (China)	Shireen Jejeebhoy (India)
Secretary General and Treasurer (1 seat, two nominees)	Patrick Deboosere (Belgium)	Nico van Nimwegen (Netherlands)
Council member for Africa (1 seat, two nominees)	Ayaga Bawah (Ghana)	Jean-Francois Kobiané (Burkina Faso)
Council member for Asia and Oceania (1 seat, two nominees)	Mohammad Jalal Abbasi-Shavazi (Iran)	Samir KC (Nepal)
Council member for Europe (1 seat, two nominees)	Mikko Myrskylä (Finland)	Clémentine Rossier (Switzerland/Burkina Faso)

Council member for Latin-America (1 seat, two nominees)	Wanda Cabella (Uruguay)	Suzana Cavenaghi (Brazil)
Council member for North-America (1 seat, two nominees)	Irma Elo (United States)	David Lam (United States)
Council Member at large (4 seats*, 8 nominees)		
Sajeda Amin (Bangladesh)	Samuel Clark (United States)	
Parfait Eloundou-Enyegue (Cameroon)	Edith Gray (Australia)	
Fernando Lozano (Mexico)	Letizia Mencarini (Italy)	
France Meslé (France)	Zitha Mokomane (Botswana)	

**Based on the assumption that IUSSP membership remains below 2,000 on 30 June 2017.*

Additional candidate proposed by the membership:

Clifford Odimegwu (Nigeria), presented as candidate for Council member at large.

Candidates for the 2021 Committee on Nominations

According to the IUSSP Constitution, the Committee on Nominations is to be elected by the General Assembly (except for its chair, who is the outgoing President) and all its members must have different citizenships. Given that this procedure is potentially time-consuming and not particularly democratic, the IUSSP Council proposes this year that the membership select the members of the next Committee on Nominations, a vote which will need to be formally ratified by the General Assembly in Cape Town. The IUSSP Council selected 15 members from all different regions. In each region, the member receiving the most votes will be elected. In addition to those five members, the candidate who received the most votes will also be elected as 6 members need to be elected to the Committee on Nominations.

The list of candidates proposed for the 2021 Committee on Nominations will be sent to members soon.

2017 Constitutional Revision

A proposal to amend the Constitution will be presented to members in the coming weeks. It is the first step in a long process that will include discussion and a vote at the next General Assembly in Cape Town, followed, if the General Assembly adopts the revision, by a final vote by IUSSP members before the end of the year.

This revision does not seek to fundamentally alter the way the IUSSP functions. Its principal aim is to clarify, simplify, adapt the Constitution to new technologies and, last but not least, allow the IUSSP to adapt more easily if needed. Indeed, in the current Constitution, most changes require a General Assembly (which occurs only every 4 years).

The main changes would be:

1. **The creation of a by-laws section**, which can be changed by Council rather than through a Constitutional revision. The aim is to increase flexibility but also to include some additional written rules to guide the Council. These by-laws would include: a) articles dealing with the specific procedures pertaining to membership management, - these describe the way IUSSP functions since having switched to using online membership software; b) articles dealing with the details of the electoral procedures.
2. **The possibility to organize an Online General Assembly** of members, if the membership needs to be formally consulted without having to wait several years.
3. **The possibility for the IUSSP to affiliate with other organizations** without calling a General Assembly and the possibility **for organizations to affiliate with the IUSSP** (but without granting them voting rights).
4. **A simplification of the Constitutional revision process.**
5. **The clarification of roles** of the Council members, Officers and Executive Director.

IPC2017 scientific programme

Preparations for IPC 2017 in Cape Town, South Africa are in full swing. At the 13-14 April meeting of the International Organising Committee (IOC) in Paris, the preliminary scientific programme was approved and plans for special sessions and plenaries were made in collaboration with National Organising Committee (NOC) members from Statistics South Africa, and representatives from UNFPA and the United Nations Population Division. On 15 April authors were notified of paper acceptances and registration and travel assistance applications for the Conference opened on the IUSSP website. **All those interested in population research are invited to register to attend the conference.**

For the 2017 Conference there will be 240 session slots and room for approximately 1,000 posters. Some 216 session slots have been allocated for papers submitted via the Call for Papers including 8 session slots for the African Population Day organized by the NOC. The IUSSP set aside up to 20 session slots for **Sponsored Research Leader Sessions**, which are offered to organizations who contribute a minimum of \$10,000. Given the large number of submissions, organizers had to waitlist or assign to the poster sessions many excellent papers.

All presenting authors of a communication were requested to register online by 15 June,. A request for financial support was also considered temporarily as a means to secure the paper's place on the programme. Papers whose presenting author had not registered by 15 June will be removed from the programme so that authors of waitlisted papers can be invited as replacements with enough lead time to secure funding. Sessions with fewer than 3 papers will be merged with other sessions. A **tentative programme** is available on the conference website. It will be updated regularly as cancelled papers are replaced by waitlisted papers.

The IUSSP has now made decisions on travel support for participants on the programme. Over 700 IUSSP members submitted an application by the 15 May deadline. Unfortunately travel funding for the 2017 International Population Conference is very limited and we were able to offer funding only to 183 presenting authors, chairs, and discussants from middle- and low-income countries in regular sessions. Travel support was provided thanks to funding from

UNFPA, Wellcome Trust, a grant made to support scholars involved in the Population and Poverty (PopPov) Research Network, and funds received from organizations who are sponsoring Research Leader Sessions. The IUSSP Council also voted to contribute a significant amount of reserve funds to support travel grants. The NOC plans to fund an additional 50-100 participants. The IOC hopes in the end to be able to offer at least partial funding to all presenting authors of an oral communication on the programme from middle- and low-income countries who need funding to attend. We regret, however, that we are currently unable to fund presenting authors of many of the excellent papers that were accepted as posters. We thank the many participants, and their institutions, who have been able to secure their own funding to register and attend the Conference.

There are now over 1,200 people registered to participate in the Conference and we expect many more before the expiration of the reduced registration fees on 15 September 2017. Please check the [Conference website](#) for more information on side meetings, exhibits, plenary sessions and training events that will be organized before and during the Conference. The sessions will be scheduled at the end June and the Conference schedule should be available online by early July. We look forward to seeing as many of you as possible in October in Cape Town.

Sponsored Research Leader Sessions

For the first time, the IUSSP is offering the opportunity for a limited number of organizations working in the population field to organize a 90-minute session as part of the regular scientific programme of the conference. The International Organizing Committee has set aside up to 20 session slots for Sponsored Research Leader Sessions, which are offered to organizations who contribute a minimum of \$10,000 which will go to provide travel support to developing country participants to attend the conference.

This is a unique opportunity to highlight research on population issues carried out or supported by your institution to the global community of leading population scholars and policy makers who will be attending the Conference.

Find out how to hold a Sponsored Research Leader Session.

Current list of Sponsored Research Leader Sessions:

- **Measurement and family planning 2020: the role of data in moving from a global goal to country action.**
– *Family Planning 2020*
- **From Rio 1992 to COP21. What have we learned about population-environment interactions?**
– *French Institute for Demographic Studies (INED)*
- **Migration into the European Union: consequences of alternative migration scenarios on future population composition.**
– *European Commission's Joint Research Centre (EC-JRC) / International Institute for Applied Systems Analysis (IIASA) / Centre of Expertise on Population and Migration (CEPAM)*
- **Abortion incidence - Indirect and direct estimates.**
– *Guttmacher Institute*
- **Our next world – Rethinking demography.**
– *World Demographic Forum in collaboration with the International Federation of Pharmaceutical Manufacturers & Associations*
- **Family planning, education, depopulation, and the environment.**
– *University Corporation for Atmospheric Research (UCAR)*
- **Innovations in the analysis of disability dynamics.**
– *Max Planck Institute for Demographic Research (MPDIR)*
- **Is your research reproducible? Common challenges and promising steps.**
– *Guttmacher Institute*

Note: *Several other proposals for Sponsored Research Leader Sessions have been received but they are not yet finalized.*

Simultaneous translation in Cape Town

IUSSP needs you!

As you know, the next International Population Conference will be held in Cape Town, South Africa at the end of October 2017. This is the first time that the Conference will be held in sub-Saharan Africa and it is very important to allow all our colleagues, especially students and researchers from Francophone Africa, to fully benefit from the Conference by offering simultaneous translation for as many sessions as possible.

Currently, the budget available does not allow us to provide simultaneous English/French translation for all sessions. We are actively searching for additional funding.

We reach out to all IUSSP members to participate in this effort by making a specific donation to the Translation Fund. Contribute even a small amount. Spread the word to your colleagues. By doing this you will show your commitment to maintaining the multilingual dimension of our association and to support the cultural diversity of the population sciences.

For a donation, click [here](#).

IUSSP contributions to UN migration and refugee compacts

The International Population Conference in Cape Town will include some thirty sessions focusing on refugee and migration issues and as well as a plenary session on International Migration and an invited session organized by the UN Population Division, which will focus on the global compact for safe, orderly and regular migration (*read below*). Ellen Percy Kraly (Colgate University), who represented the IUSSP in preparations for the Summit on Refugees and Migrants (*read previous article*), invites IUSSP members to contribute their expertise on these topics in preparation of forthcoming UN activities.

In adopting the [New York Declaration for Refugees and Migrants](#) in September 2016, Member States of the United Nations agreed to develop a global compact for safe, orderly and regular migration. The [compact for migration](#) will be described as “the first intergovernmentally negotiated agreement, prepared under the auspices of the United Nations, to cover all dimensions of international migration in a holistic and comprehensive manner.” Separately, the General Assembly is expected to adopt a global compact on refugees in the fall of 2018.

In order to formally adopt the global migration compact, an intergovernmental conference will be convened in September 2018. It is expected that the conference will produce a programme of action that could, potentially, drive the global migration policy agenda for decades to come. (Compare with the Programme of Action adopted at the 1994 International Conference on Population and Development, which continues to drive population policies, programmes, and research around the world.)

During 2017, the General Assembly will convene six informal sessions to gather information on the following themes: (1) human rights of migrants; (2) regular and irregular migration; (3) migration governance; (4) migrant contributions to development; (5) drivers of migration, and (6) human trafficking and migrant smuggling. In recognition of the crucial contribution of the global research community to the preparations of the global migration compact, the President of the General Assembly will also convene several informal hearings with civil society, the private sector, academia and migrants over the course of the next 12 months. The IUSSP intends to actively contribute to the preparations of the global migration compact, as it did for the NY Declaration.

The discussion and analysis among governments of processes of human mobility can benefit greatly from the methods and materials of the population sciences. The professional community of demographers and other population scientists can contribute much needed evidence on international migration as well as creative perspectives on demographic data, measurement and estimation regarding both voluntary and forced migrations, including their causes and consequences at multiple geographic scales, and the experience and life course of individual migrants.

Fortuitously, the preparations for the global conference coincide with the International Population Conference in Cape Town in October-November 2017. An invited session at the IPC focusing on the global compact for safe, orderly and regular migration is being organized by the UN Population Division. A critical objective of the session will be to finalize a statement by the IUSSP concerning priority needs for data and research on international migration, whether voluntary or forced, as a means of improving the information available on migration trends and migrant characteristics, and of promoting a better understanding of the causes and consequences of international migration.

Holding consultative status with the United Nations Economic and Social Council, the IUSSP is formally considered to be a stakeholder in all consultations related to UN programs and activities in the area of development. The 2017 International Population Conference in Cape Town provides an important opportunity for population researchers to contribute to what could potentially be a major milestone in global efforts to improve the governance of international migration in all its dimensions and to share more equitably the responsibility for assisting forced migrants and displaced populations throughout the world.

Members (and non-members) of the IUSSP are encouraged to participate in these and other activities of the organization concerning international migration, including refugees.

Population scientists interested in contributing expertise to the development of a formal statement by the IUSSP concerning population data and research to promote evidence-based migration policies may contact [John Wilmoth](#) or [Bela Hovy](#) of the UN Population Division for further information.

Those interested in developing IUSSP contributions to the various events, sessions and hearings taking place as part of the preparatory process for the [migration compact](#) or the [refugee compact](#) are invited to contact [Ellen Kraly](#).

Recent research and training workshops on social media data

Thanks to financial support from the William and Flora Hewlett Foundation to the IUSSP and the Population Association of America (PAA) to support demographers' participation in the Data Revolution, the **IUSSP Panel on Big Data and Population Processes** recently organized three workshops with the main goal of fostering collaboration and favoring communication between demographers and computer scientists.

Training Workshop on Social Media and Demographic Methods at the Annual Meeting of the Population Association of America (PAA), Chicago, United States, 26 April 2017.

This training workshop focused on accessing Social Media data and analyzing them using computational and demographic methods. The workshop provided an introduction to tools like Application Programming Interfaces (APIs) for collecting data from social media. Emilio Zagheni, Lee Fiorio and Kivan Polimis (University of Washington) led hands-on activities related to the programmatic use of the Twitter and Facebook Adverts Manager APIs. The workshop also presented examples of demographic and computational methods that can be used to gain insights from social media data, and generated discussions among the 45 participants about recent developments in the emerging field of digital demography. Materials for the workshop are available [here](#).

Tutorial on Digital Demography at the 26th International World Wide Web Conference (WWW2017), Perth, Australia, 4 April 2017.

This tutorial, led by Ingmar Weber (Qatar Computing Research Institute) and Bogdan State (Stanford University), offered an overview of fundamental concepts in demographic research. The first part showcased traditional data collection and analysis methods such as census microdata, the construction of a basic life table, panel datasets and survival analysis. The second part presented a number of studies that have tried to overcome limitations of traditional approaches by using innovative methods and data sources ranging from geo-tagged tweets to online genealogy. Emphasis was given on methodological challenges such as issues related to bias, as well as on how to collect open data from the World Wide Web. Materials for the tutorial are available [here](#).

Workshop on Social Media and Demographic Research: Applications and Implications at the 11th International AAAI Conference on Web and Social Media (ICWSM-17), Montreal, Canada, 15 May 2017.

This research workshop, led by Emilio Zagheni (University of Washington), Ingmar Weber (Qatar Computing Research Institute) and Tom Le Grand (University of Montreal), brought together the community of demographers from Montreal and elsewhere, and the community of computer scientists who regularly attend ICWSM, for a lively research forum on recent developments to leverage traditional and new data sources. The program and the slides are available [here](#).

Tutorial on Digital Demography

Cologne, Germany, Monday, 10 July 2017; 14:30-17:45

This tutorial is organized by the **IUSSP Scientific Panel on Big Data and Population Processes** as a side event at the **3rd Annual International Conference on Computational Social Science (IC2S2 2017)**, Cologne, Germany, 10-13 July 2017.

To register for this tutorial please: REGISTER HERE. (Sign-up for single tutorials may be closed if the maximum capacity is reached.)

If you have trouble registering please contact the organizers: **Bogdan State** (Stanford University) or **Ingmar Weber** (Qatar Computing Research Institute).

Summary:

This tutorial, led by **Bogdan State** (Stanford University) and **Ingmar Weber** (Qatar Computing Research Institute) will review the emergence of increasingly diverse computational methods and digital datasets in demography. The tutorial will be split into two parts. The first part will provide an overview of traditional statistical methods and data collection techniques in demography. The second part will focus on current innovation digital data and methods is facilitating in the study of human populations. The tutorial will cover similar material as the one presented in at the WWW 2017 Digital Demography Tutorial in Perth, Australia, material for which is available [here](#).

Note: No travel support is available for this workshop.

Programme:

Demography is the science of human populations and, at its most basic, focuses on the processes of (i) fertility, (ii) mortality and (iii) mobility. Whereas modern states are typically in a reasonable position to keep records on both fertility and mortality, through birth and death registrations, as well as through censuses, measuring the mobility of populations represents a particular challenge due to reasons ranging from inconsistencies in official definitions across countries, to the difficulty of quantifying illegal migration. At the same time, mere numbers, whether on births, deaths or migration events, shed little light on the underlying causes, hence providing insufficient information to policy makers.

The use of digital methods and data sources, ranging from social media data to web search logs, offers possibilities to address some of the challenges of traditional demography by (i) improving existing statistics or helping to create new ones, and (ii) enriching statistics by providing context related to the drivers of demographic changes. This tutorial will help to familiarize participants with research in this area. First, we will give an overview of fundamental concepts in demographic research including the population equation. We also showcase traditional data collection and analysis methods such as census microdata, the construction of a basic life table, panel datasets and survival analysis.

In the second part, we present a number of studies that have tried to overcome limitations of traditional approaches by using innovative methods and data sources ranging from geo-tagged tweets to online genealogy. We will put particular emphasis on (i) methodological challenges such as issues related to bias, as well as on (ii) how to collect open data from the World Wide Web.

The slides and other material for this tutorial are available at: <https://sites.google.com/site/digitaldemography/>.

Workshop on the "50 questions on the Demographic Dividend in Africa"

Yaoundé, Cameroon, 31 March 2017

Organized by the **IUSSP Network on Strengthening Demographic Training in Francophone Africa (FraNet)**

The Network's Steering Committee :

- *Chair:* Parfait Eloundou Enyegue (Cornell University)
- *Members:* Gervais Beninguissé (Institut de Formation et de Recherche Démographiques), Philippe Bocquier (Université Catholique de Louvain), Valérie Delaunay (Institut de Recherche pour le Développement), Jean François Kobiané (Université Ouaga I Pr Joseph Ki-Zerbo), Richard Marcoux (Université de Laval).

This workshop on the “50 Questions on the Demographic Dividend in Africa” communication document was held on 31 March 2017 in Yaoundé, Cameroon at the headquarters of Cameroon National Association for Family Welfare (CAMNAFAW), a local branch of the International Planned Parenthood Federation). This workshop is part of the activities of the IUSSP Network for the Strengthening of Demographic Training in Francophone Africa (FraNet) and was organized in collaboration with the Cellule d'Appui à la Recherche et à l'Enseignement des Institutions Francophones d'Afrique (CARE-IFA) and the Institut de Formation et de Recherche Démographiques (IFORD) and with financial support from The William and Flora Hewlett Foundation.

The workshop was facilitated by professors Parfait Eloundou-Enyegue and Gervais Béninguissé. Participants in the workshop were some 15 journalists from the Health and Development Network (JNMAP/REJOSADE), a partner of choice for this activity given its interest in health and development issues in general and reproductive health in particular.

Professors Parfait Eloundou-Enyegue and Gervais Béninguissé facilitated the meeting.

This one-day workshop consisted in working to simplify and adapt a communication document entitled "50 Questions on the Demographic Dividend" so as to facilitate its understanding by a wider audience. This workshop follows a series of training workshops to analyze the demographic dividend in Africa with a focus on education (Ouagadougou November 2013; Yaoundé, March-April 2014) and economic growth (Ouagadougou, September 2014, Yaoundé; January 2015; Johannesburg, November and December 2015).

The main goal of the workshop was to take advantage of the journalists' expertise by asking them to provide critical feedback on the "50 questions" document on both the content and the form and illustrations. At the same time, this exercise helped deepen the journalists' understanding of the concept of demographic dividend, which in turn will help them disseminate this information to the public.

Cyberseminar on Culture, Beliefs and the Environment

15 May 2017 to 19 May 2017

Background Papers: Religious belief and environmental challenges in the 21st century

Forum

- [View Postings](#)
- [PERN Webinar Video](#)

Invited Experts

Vegard Skirbekk (Columbia Aging Center and Norwegian Institute of Public Health)	Culture and Demographic Development
Raya Muttarak (IIASA)	Focusing on Demographic Differential Vulnerability
Richard Wilk (Department of Anthropology, Indiana University)	Without Consumer Culture, There is No Environmental Crisis
Tom Dietz (Department of Sociology, Michigan State University), Rachael Shwom (Department of Human Ecology, Rutgers University)	Culture, Environmental Risk Perception and Behavior

Summary

This cyberseminar featured a [webinar](#) hosted by Future Earth. The webinar summarized the background paper, and introduced the themes being addressed by the other expert panelists.

This Population-Environment Research Network (PERN) cyberseminar focuses on culture, belief systems, values, and the environment. The world is facing dramatic demographic shifts, and these are associated with different cultural values and belief systems that have implications for the environment. Industrialized countries face rapid aging while developing countries have large children and youth populations. These different patterns, and the cultural values and beliefs associated with them, have implications for population dynamics and how societies relate to the environment and how they are impacted by environmental changes and hazards. This relatively little studied area of the population-environment nexus is ripe for new discoveries.

Culture, belief systems and values are central to environmental decision making and behavior and to how people perceive and respond to risks and crises. Census, survey, focus group and other demographic data collection methods are central to understanding belief systems as they relate to the demographic makeup of society, including racial and ethnic groups, age and sex distribution, education attainment, and geographic factors. The cyberseminar will address a number of topics, including: (1) cultural attitudes and values as they relate to perceptions of the environment; (2) culture, belief systems, values and environmentally significant consumption patterns; (3) religious beliefs and their implications for age structure and population growth; (4) how religious and other beliefs vary by population composition; and (5) vulnerability and perceptions of risk as they relate to different demographic groups.

This cyberseminar is co-organized with the [Columbia Aging Center](#).

IUSSP Seminar on Mortality analysis and forecasting

New Delhi, India, 6-8 April 2017

Organized by the **IUSSP Scientific Panel on Lifespan Extension with Varying Cause-of-death Trajectories**, in collaboration with **Jawaharlal Nehru University (JNU)**, **Max Planck Odense Center (MaxO)** and the **Australian National University (ANU)**.

Organizing Committee:

- **Nandita Saikia** (*Jawaharlal Nehru University*)
- **Vladimir Canudas-Romo** (*Max-Planck Odense Center*).

The International Seminar on Mortality Analysis and Forecasting was held 6-8 April 2017 at the Jawaharlal Nehru University, in New Delhi, India. The meeting received generous support from the Danish Agency for Science, Technology and Innovation as well as from Jawaharlal Nehru University.

The scientific programme consisted in 24 presentations in regular sessions and 11 flash presentations (3-4 minute presentations of slides focusing on the highlights of a poster). The third day of the meeting was devoted to providing hands-on training in R on mortality analysis to PhD students who had attended the seminar. A total of 35 presenters and 15 additional researchers participated in the seminar. Participants represented a variety of disciplines – demographers, statisticians, economists and public health specialists – and included senior reserachers, junior faculty as well as PhD or master students from the Centre for the Study of Regional Development (CSRD) at JNU.

The seminar focused on themes related to mortality and causes of death studies in India and the region, and forecasting methodologies in international settings, as well as methodologies for countries with limited data. The goal of the seminar was not to answer a single question but to try to bring together researchers from developing and developed countries with an interest in mortality. More specifically, the objectives of the seminar were: i) to present studies on the past and present of mortality and causes of death in India and the region; ii) to highlight new methodologies on mortality forecasting; and iii) to discuss possible forecasting methodologies to be used for countries with deficient data.

Among the serious concerns discussed at the meeting was the availability of reliable data on deaths and population. For example, the National Statistical Office of India does not publish yearly death counts by age and sex, but produces already modeled life tables. This discussion was further highlighted when colleagues from the “**Million deaths study**” presented their data, but did not have a date for the possible public dissemination of the information to researchers.

Researchers have had to use alternative data sources to do their demographic work, and very inventive sources of information were highlighted during the seminar. Although not discussed a new source of data has started in India which could change completely the paradigm of data information in the country, namely the scanning of 1.2 billion people in the [Aadhaar project](#). It would be vital for the future work of demographers in the country that this information also is made available to researchers.

IUSSP Workshop on Subjective Well-being and Demography

Integrating subjective well-being in the demographic research agenda

Chicago, United States, 26 April 2017

Organized by the **IUSSP Scientific Panel on Subjective Well-being and Demographic Events**.

Principal organizer: *Letizia Mencarini* (Dondena Centre for Research on Social Dynamics and Public Policy)

This workshop was organized as a side-meeting before the 2017 Annual Meeting of the Population Association of America, which took place in Chicago, 27-29 April 2017. The side meeting was an informal workshop for scientists interested in integrating subjective well-being into the analysis of demographic processes. As was also clear from the background of the participants, the workshop had a clear interdisciplinary agenda, capturing insights from demography, economics, sociology and psychology. The workshop was based on an initial call for papers, for which many high quality papers were received, more than could be accommodated in the two sessions of the workshop.

The meeting was introduced by Letizia Mencarini (chair of the IUSSP scientific group), who gave an overview of the literature, with a focus on areas in which the concept of subjective well-being is being used in conjunction with studying demographic events and processes. She then moved on to give an overview of the gaps of this literature and potential weaknesses, which the research community may want to address. She also provided several suggestions for new lines of research.

In the first session Kelsey O'Connor from University of Southern California presented a paper in which he analysed the impact of the Great Recession across different demographic groups in the US. He reported that the Recession's far-reaching consequences were not equally felt. The foreign-born fared the worst, men worse than women, and non-youth worse than youth, where declining income and rising unemployment best explain the effects. This analysis is based on data from the General Social Survey (1972 to 2014). The analysis was based on individuals' level regressions, including macro control variables as a means to estimate group-specific trends and deviations from trend occurring in 2008 and 2010.

The second paper was presented by Daniele Vignoli (co-authored by Gianmario Alderotti) and focussed on the impact of term-limited working contracts on fertility intentions, bringing in the role of subjective well-being. The analysis is novel in the sense that the population on limited contracts is heterogeneous. It ranges from those in precarious situations, who move from one short-term contract to another to high career achievers where movements across contracts are part of their career progression. These two types of workers will most likely report strong differences in subjective wellbeing, and indeed the analysis indicates how controlling for subjective well-being enables the analysts to distinguish these groups - and show that the effect on fertility intentions indeed differ.

The third paper, entitled "Son Preference, Parental Satisfaction, and Sex Ratio Transition", was presented by Kageyama Junji of Meikai University (co-authors Risa Hagiwara, Kazuma Sato and Eriko Teramura). This paper considered to what extent whether reported subjective well-being is affected differently depending on the gender of the children born. The focus is put on societies with strong gender preferences for children. They perform the analysis for different subjective well-being domains.

The fourth paper was presented by Nicolò Cavalli (university of Oxford), with the title "Assortative mating in subjective wellbeing and fertility outcomes. This paper tackles a highly interesting issue not often dealt with in the literature - though as also pointed out by Mr Cavalli, is hard to resolve from an empirical point of view. The idea is that individuals may systematically

form partnership - in part - driven by their subjective wellbeing. Using the Understanding Society survey (i.e. the former BHPS) he presented various strategies for identifying whether this is indeed the case. His preliminary analysis suggests that there is potentially an important effect in that not only may subjective well-being itself increase your chances for finding a partner, but they tend to have a systematic matching based on their subjective well-being.

The fifth paper was presented by Wang Jia of University of Wisconsin (co-author: Shu Cai - Jinan University). The title of the paper was "Less Advantaged, More Optimistic? Subjective Well-Being among Rural, Migrant and Urban Populations in Contemporary China". Apart from presenting analysis from the recent national data set from China Family Panel Studies, for which the panel was not very familiar with, the study provided new evidence regarding the subjective well-being puzzle across multiple indicators among rural, migrant and urban populations in contemporary China. The results show that rural people on average have higher level of life satisfaction and are more confident about the future than migrants or urban residents, despite their disadvantaged economic situation. The decomposition analyses reveal subjective social status plays a substantial role in accounting for the group disparities in life satisfaction and confidence, whereas objective social status and experiences of social mobility have less explanatory power. These findings suggest the importance of within-group comparison in shaping individuals' well-being in segregated societies such as China.

The final paper was presented by Letizia Mencarini of Bocconi University (Co-authors: Pierluigi Conzo (University of Torino) and Giulia Fuocho (University of Padua) and concerned the impact of childbearing on subjective wellbeing for men and women of different ages (i.e. different life stages) in rural Ethiopia. This is an important contribution because it is among the very few studies of fertility and subjective well-being in low income settings. They show that fertility has a detrimental effect on subjective well-being for women in the short run (i.e. when children are born and are young), whereas there is a positive effect of fertility for men's subjective well-being in order age. The study is useful as it explains the fertility & poverty puzzle so often highlighted for low-income countries. Essentially it confirms anthropological studies that social status (and hence subjective well-being) is increased for men in old age if they have a large number of children (which is otherwise counter-productive in terms of poverty).

The workshop was wrapped up by Hans-Peter Kohler who discussed the contributions and discussed further directions for research - incorporating the findings presented in the side-meeting. One important contribution was made by Art Liefbroer, who argued that one weakness of most existing surveys is that questions concerning subjective well-being tend to be too broad. Generally questions are framed either as a general 10-point scale measure about Happiness or life satisfaction. However, as family life, childbearing included, consists of a range of elements and domains, one needs to consider expanding existing surveys to better captures those particularities. This concern was confirmed by panel members, but they also pointed out (e.g. Letizia Mencarini) that some surveys do ask subjective well-being questions for different domains, and there is an indication that indeed subjective well-being domains react differently to demographic events.

Godelieve Masuy-Stroobant (1948-2017)

It is with great sadness that we inform you of the passing of our colleague and friend Godelieve Masuy-Stroobant on May 22, aged 69. Professor Emeritus since 2013, Godelieve was during 44 years one of the key members of the Center for Demographic Research of the Université catholique de Louvain (UCL), which she led from 2006 to 2009. She was very appreciated for her engagement in teaching. Godelieve was also a renowned researcher who greatly contributed to the scientific advancement of our discipline.

Her main research interests were related to the history of child health and mortality from the 19th century to the present, and the procedures for recording vital events. Godelieve was a scientific advisor to the Belgian “Office National de l’Enfance” (ONE) since 1987, acted as a member of the Higher Council of Statistics (Conseil supérieur de la Statistique) for many years. Her involvement in the civil society was also very important.

Through her dynamism and enthusiasm, Godelieve has definitely left her mark on UCL’s Center for Demographic Research, but she has also inspired generations of students and PhD researchers.

We will surely all miss her.

Centre for Demographic Research Université catholique de Louvain.

Testimonial by Jacques Vallin :

Quel choc ! Godelieve nous a quittés. On aurait pourtant presque pu la croire immortelle, tant elle était vivante ! En tout cas on ne s’attendait vraiment pas à un départ si précoce... c’était tout simplement impensable.

Godelieve était une femme formidable, extraordinairement rayonnante, attachante, entraînante, subjuguante, émouvante, chaleureuse, humaine, intelligente... Tous ceux qui l’ont connue, aimée, admirée, ou simplement côtoyée, ne serait-ce même qu’une seule fois, éprouvent aujourd’hui un profond sentiment d’injustice.

J’ai croisé Godelieve pour la première fois dans les années 1970 au cours d’une réunion d’échange à Paris entre chercheurs de l’INED et de l’UCL. Tout de suite elle m’a fasciné. Encore le mot est-il trop faible. Sa fraîcheur, sa beauté, son magnétisme, sa parole claire et chargée de sens, son discours scientifique construit et convaincant, ancré dans les questions sociales et notamment celle des inégalités de santé et de mortalité. Je suis immédiatement tombé sous le charme. Et nos rencontres ultérieures ne m’ont jamais désenchanté. C’était toujours un grand plaisir de converser avec elle. Elle fourmillait d’idées et ne tarissait jamais de commentaires pertinents, parfois tristes parfois plus joyeux, sur les maux de notre siècle, les injustices de nos sociétés, qu’elles soient du nord ou du sud, les remèdes qu’on pourrait y apporter. Nous n’étions pas toujours d’accord mais elle avait toujours de bons arguments et, souvent, elle réussissait à me convaincre de réviser les miens. Son aptitude à parler était merveilleuse, parfois je me contentais de savourer de longs moments à l’écouter.

C’est certainement grâce à cette faculté d’exprimer qu’elle a pu surmonter les graves épreuves que la vie lui a imposées. Je me souviendrai toujours de la lettre que j’ai reçue à la mort de David et de ses confidences sur de graves soucis que beaucoup auraient considéré trop intimes pour en parler. Et son écoute des problèmes des autres était à la hauteur de ses propres confidences.

Comme tous mes collègues j’ai bien sûr énormément apprécié les échanges scientifiques avec Godelieve. Mais ce qui m’a le plus marqué c’est son art de traiter des questions plus personnelles, toujours avec lucidité, sobrement mais vraiment. Loin de l’éloigner de son accomplissement personnel, son questionnement scientifique s’enrichissait constamment de son approche humaniste du monde, de sa générosité aux autres, des plus proches aux plus lointains.

À tous, elle nous manque terriblement.

Jacques Vallin

Read the testimonials and tributes from her colleagues and former students.

IUSSP at the 2017 PAA Annual Meeting

Chicago, United States, 27-29 April 2017

The IUSSP organized two pre-conference workshops on 26 April and had an exhibit booth at the 2017 Annual Meeting of the Population Association of America (PAA), which was held in Chicago (United States) 27-29 April.

- The IUSSP Scientific Panel on Big Data and Population Processes organized a **Training Workshop on Social Media and Demographic Methods**.
- The IUSSP Scientific Panel on Subjective Well-being and Demographic Events held a **Workshop on Subjective Well-being and Demography - Integrating subjective well-being in the demographic research agenda**.

The IUSSP also organized a meeting with the regional population associations to prepare two sessions at the 2017 International Population Conference.

Once again, the IUSSP also had a booth where Council members and staff took turns to answer members' questions, recruit new members and provide information on IUSSP scientific and training activities and the forthcoming conference in Cape Town.

New IUSSP members and student associates

234 new members joined the IUSSP between 1 March and 1 June 2017.
