Family Planning's Importance for Meeting SDG 11

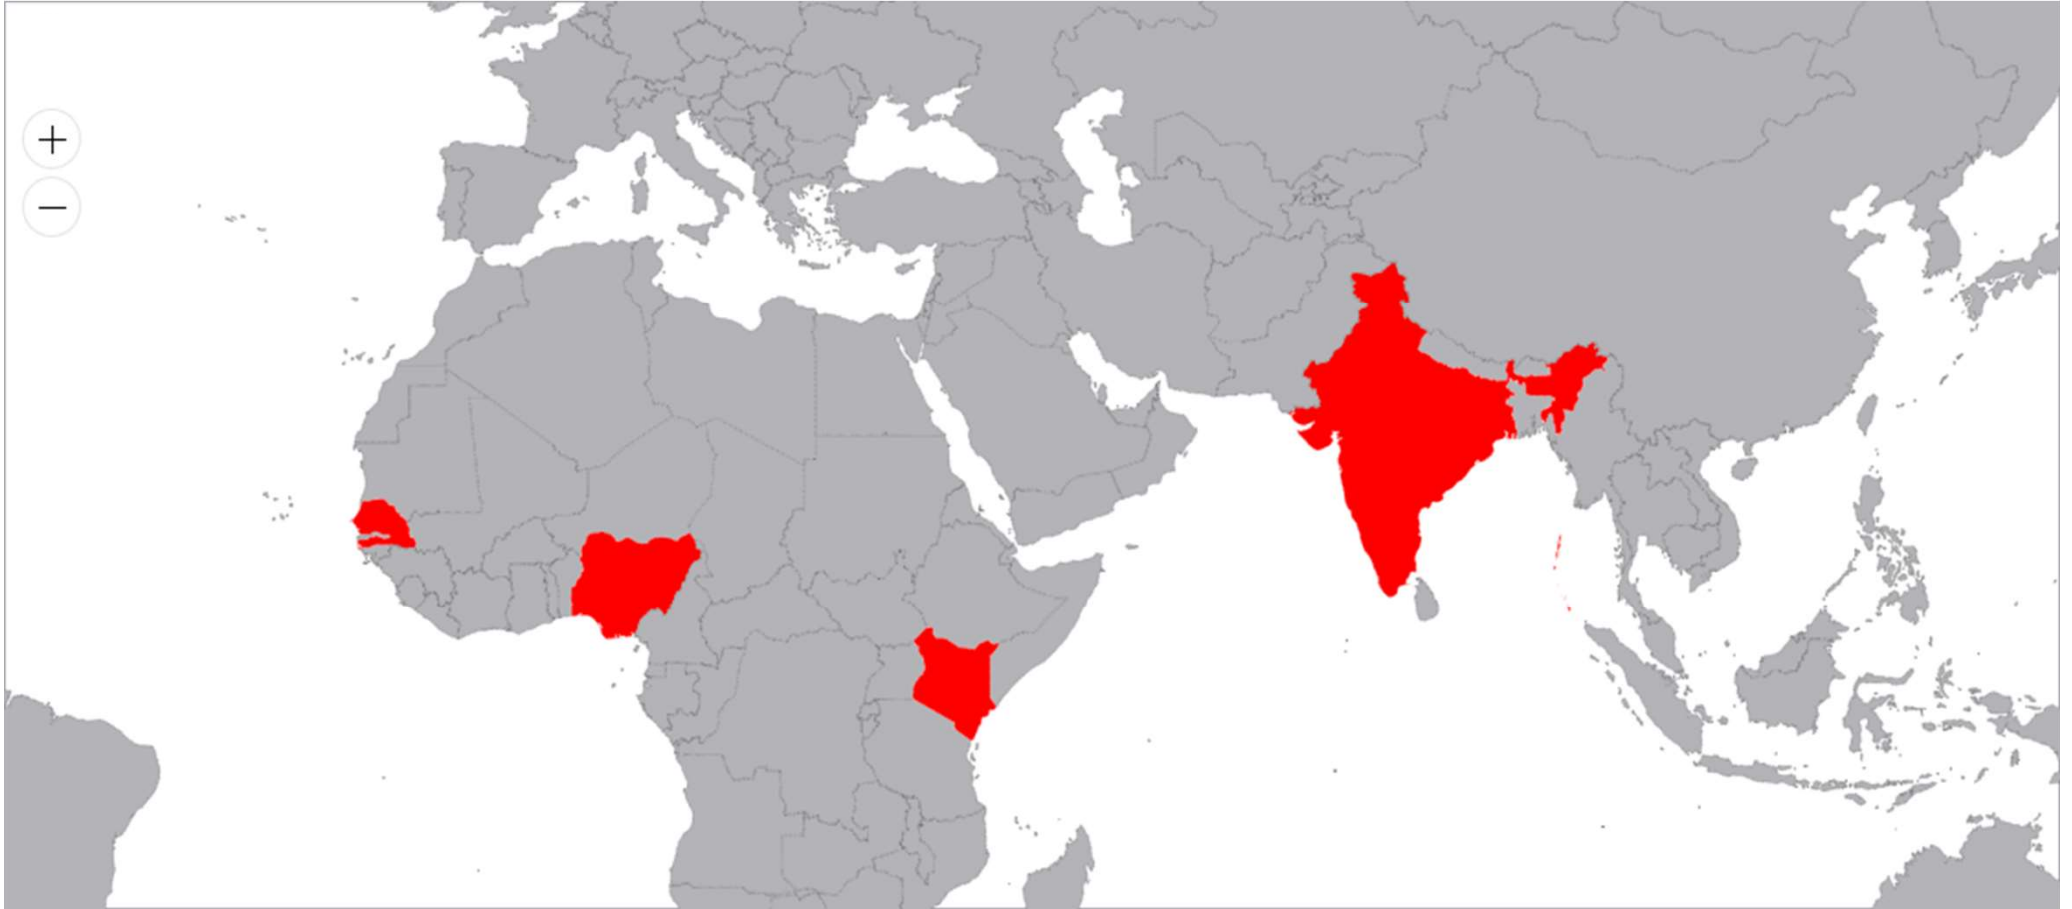

What do we know about family planning programming in urban areas?

URHI Objectives

- Integrate FP with MNCH and RH services
- Quality of FP services
- Public-private partnerships
- Demand generation
- Advocacy

Community events and community health workers important in all countries

Supply side programming important in all countries

Radio and television important in some countries

Print media important in some countries

NEED multi-component programs in urban settings

What happens after the funding ends?

NURHI Sustainability Study

2015

2017

Program exposure over time (women)

Service use over time (facility)

Evidence Gaps for Urban FP Programming

Evidence Gaps for Urban FP Programming

- 1) Collecting data in urban areas is hard**
- 2) Cities are diverse**
- 3) We often miss key populations**
- 4) Data for outcomes is not readily available**
- 5) People are mobile**
